EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Jason Lohr on 01/12/05.

The application has been amended as follows:

In the claims:

Claims 47-49 have been cancelled.

Claim 51, line 7, delete "1, 12, or 47" and insert "1 or 12".

Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance: Claims 1-52 are allowed because the prior art fail to teach or fairly suggest beam parameter monitoring units as recited in the claims.

With respect to claims 1, 12, 19, 26 and 30, the prior art fail to disclose beam parameter monitoring unit for coupling with **a molecular fluorine F2 or ArF laser resonator producing a wavelength below 200 nm** and comprising beam splitter, a detector for measuring at least one

optical parameter of the output beam portion reflected by the beam splitter and a beam path enclosure containing said uncoated beam splitter and having an interior such that an optical path between said beam portion through the enclosure from said resonator to said detector is substantially free of photoabsorbing species wherein the detector including platinum silicide. The prior art instead teach devices that monitor higher wavelengths and therefore the detectors are only capable of detecting the higher wavelength range than 200 nm.

With respect to claim 37, the prior art does not teach a beam parameter monitoring unit for coupling with F2 laser resonator comprising **a detector for measuring a first beam of 157 nm radiation emitted from said resonator and a beam path enclosure having an interior free of VUV photoabsorbing species and means disposed between said resonator and said detector for separating radiation from said 157 nm radiation.** The prior art fails to provide the beam enclosure with the detector that can detect wavelength range at 157 nm.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
